

RCW 90.48.080 states that “It shall be unlawful for any person to throw, drain, run, or otherwise discharge into any of the waters of this state, or to cause, permit or suffer to be thrown, run, drained, allowed to seep or otherwise discharged into such waters any organic or inorganic matter that shall cause or tend to cause pollution of such waters according to the determination of the department, as provided for in this chapter.”

SPILL RESPONSE PLAN PROCEDURES

In case of fire or noxious fumes, **immediately call 911**. Otherwise, contact the **State 24-Hour Emergency Hotline at 1 (800) OILS-911** *and* the **US Coast Guard at 1 (800) 424-8802** with the following information:

- What was spilled? (i.e. diesel, oil, etc.) _____
- How much of the material was spilled? _____
- Where is the material going? (i.e. into bay, down boat ramp, etc.)

- Has the spilled material had any contact with Oakland Bay or any other body of water?
(provide location) _____
- Your contact information (you may be called back by local responders)

- Stop the flow if possible. Extinguish any and all ignition sources.
- Safety First! Use caution and appropriate measures to protect people from direct contact with oil, fuel or dangerous chemicals.
- Emergency spill response materials are located in the marked white box with the breakaway lock at end of the pier.
- Use either absorbent pads (flat sheets of absorbent material) or booms (long, cylindrical absorbent material) to contain the spill. Gasoline and other highly flammable materials should not be boomed.
- Absorbent materials can be treated as solid waste, provided they are not dripping oil. If necessary, put in plastic bag before disposal. Garbage containers are located at the landward end of the pier.
- Notify Al Frey at the Port of Shelton at 360-426-1151 after you have called the State and Federal Hotline numbers.
